

COVID-19 TESTING

What We Stand For

With our expertise, professionalism, state-of-the-art and highly sterile laboratories for your test needs, highly skilled, trained and experienced staff, we aim to be the leading voice of transformation and improvement of health care in Uganda.

We stand for excellence in delivering high quality, safe, effective and efficient medical laboratory diagnostic services. With a focus on excellence, we employ the latest technologies in offering top notch medical diagnostic services and medical laboratory services to the people of Uganda.

We perform advanced Polymerase Chain Reaction (PCR) and PCR-SARS-CoV-2 rapid diagnostic testing on travelers, the general public, and on behalf of private institutions.

Our Working Priorities

Safe Travels

Safeguard the health of all people including passengers who pass through Uganda's airport – from the COVID-19 virus and other infectious diseases. We also provide the required Covid Certificates to each passenger.

Convenience

Offer fast, easy and convenient testing from multiple locations and for further convenience dispatch our lab technicians to clients locations in Kampala and Entebbe. Our 2 locations are also strategically located on route to the airport in Kampala and 10 minutes away from the airport in Entebbe.

Professionalism

With our state-of-the-art facilities and equipment, we employ best practices to match international standards, and ensure the delivery of high quality, safe and effective medical testing services to you. Our highly trained and professional staff prioritizes safety and convenience for our clients. They ensure sample collection is easy and seamless, communicate effortlessly with our clients and provide them the required certificate to their chosen platform on time, whether via email, whatsapp, or a printed copy.

FLYING CERTIFICATE

Do you have an urgent flight you need to catch? Do you have an appointment you need to meet up with? For personal or business purposes, then Sameday Laboratories is here for you. With Sameday Laboratories, you can safely and securely get tested before your flight, and receive your accurate test result and flying certificate in a timely fashion. With our fast, safe, accurate, convenient and high grade testing services, we make no compromise on quality.

PCR TESTING

The PCR test used by Sameday Laboratories is a real-time test based on the reverse transcription polymerase chain reaction (RT-PCR) for the qualitative detection of nucleic acid from SARS-CoV-2 in samples of the upper respiratory tract (oropharyngeal swabs) collected from individuals who need to be tested for Covid- 19 for various reasons, belong to a risk cohort, or having been in contact with a confirmed COVID-19 patient. The results are used to identify SARS-CoV-2 RNA, which is usually detectable in oropharyngeal samples during the acute phase of the infection.

SAME DAY TESTING

At Sameday Laboratories, we pride ourselves in the speedy delivery of high quality medical testing services to you. Without any compromise on quality whatsoever, you can get tested and receive your test result on the very same day. This is one of the numerous reasons why we stand on the front line of medical laboratory and medical testing services in the country.

HOME TESTING SERVICE

To further aid your convenience, Sameday Laboratories exclusively brings to you, premium medical testing services straight to you in the comfort of your own home. You can request a home call service and we will arrive promptly at your home to obtain your nasal swab for testing, and send your test results electronically to your email and WhatsApp. Because your health and safety is of paramount importance to us, even in the comfort of your own home, we ensure the best sanitary conditions in the collection of your sample, and your safety and well-being is well assured.

HOTEL TESTING SERVICE

For the additional convenience and comfort of hotel guests we have a special arrangement with numerous hotels across the country allowing for guests to simply schedule covid tests via the front desk. Our lab technicians come to our clients without them having to step foot outside their hotels. This added special service is conducted with utmost professionalism and sanitary conditions.

WALK-IN TESTING

At Sameday Laboratories, we have ensured your convenience as you can easily walk in, get tested, receive your accurate test results quickly, and be on your way. Because we care about your convenience, we have created a system of seamless flow whereby wait times have been eliminated and you can go through the entire diagnostic testing process including test result dispatch, all in a matter of time.

CORPORATE TESTING

In partnership with corporate organisations, we provide a range of services tailored for the smooth running of businesses amidst the COVID-19 pandemic. These services come at discounted rates for our partners and ensure that they can return to the fire-proved methods of carrying out their affairs. Here are some of the corporate testing services that Sameday Laboratories currently offer:

RECRUITMENT TESTING

As part of the background research that companies engage in before hiring a new staff, we now offer discounted rates for bodies looking to ascertain the health status of prospective hires. This is now a mandatory course of action for companies to make sure that an infection will not spread through its ranks. Additionally, many businesses are returning to business as usual, it is important that new hands do not put the health of others at risk. Firms with speedy hiring processes turn to Sameday Laboratories for quick and reliable COVID-19 testing to prevent this hurdle from becoming a barrier in their recruitment.

ROUTINE AND SCHEDULE TESTING

For fact, not everyone has been vaccinated, it is vital that companies continue to carry out routine testing exercises. Along with our experts, our partners have scheduled testing periods that do not interfere with the smooth-running of their businesses. Again, since our partners test employees in bulk, they enjoy the best COVID-19 testing rates available anywhere in the world. A negative test does not mean that the person will stay free of infection forever, at least not until they are completely vaccinated. Therefore, routine testing is an invaluable way to protect your employees.

GUEST TESTING

Our corporate partners handle international businesses that may require guests to visit their facilities or buildings. We have resources for testing guests within a short notice and giving out results on the same day.

CONSULTATION

Sameday Laboratories offers consultation services to our partners who need expert advice. Our advice covers the following and more:

- In case of a COVID-19 breakout
- A (or few) positive case(s) among employees
- Measures to put in place before returning to the office amidst the pandemic
- Government liaison on COVID-19 matters

WE'VE BEEN APPROVED BY THE MINISTRY OF HEALTH TO CARRY OUT TESTING USING THE DIAGNOVITAL SARS-COV-2 REAL-TIME PCR KIT

- Validation granted August 2020
- Approved by Dr. Susan Nabadda for Director General Health Services, Ministry of Health

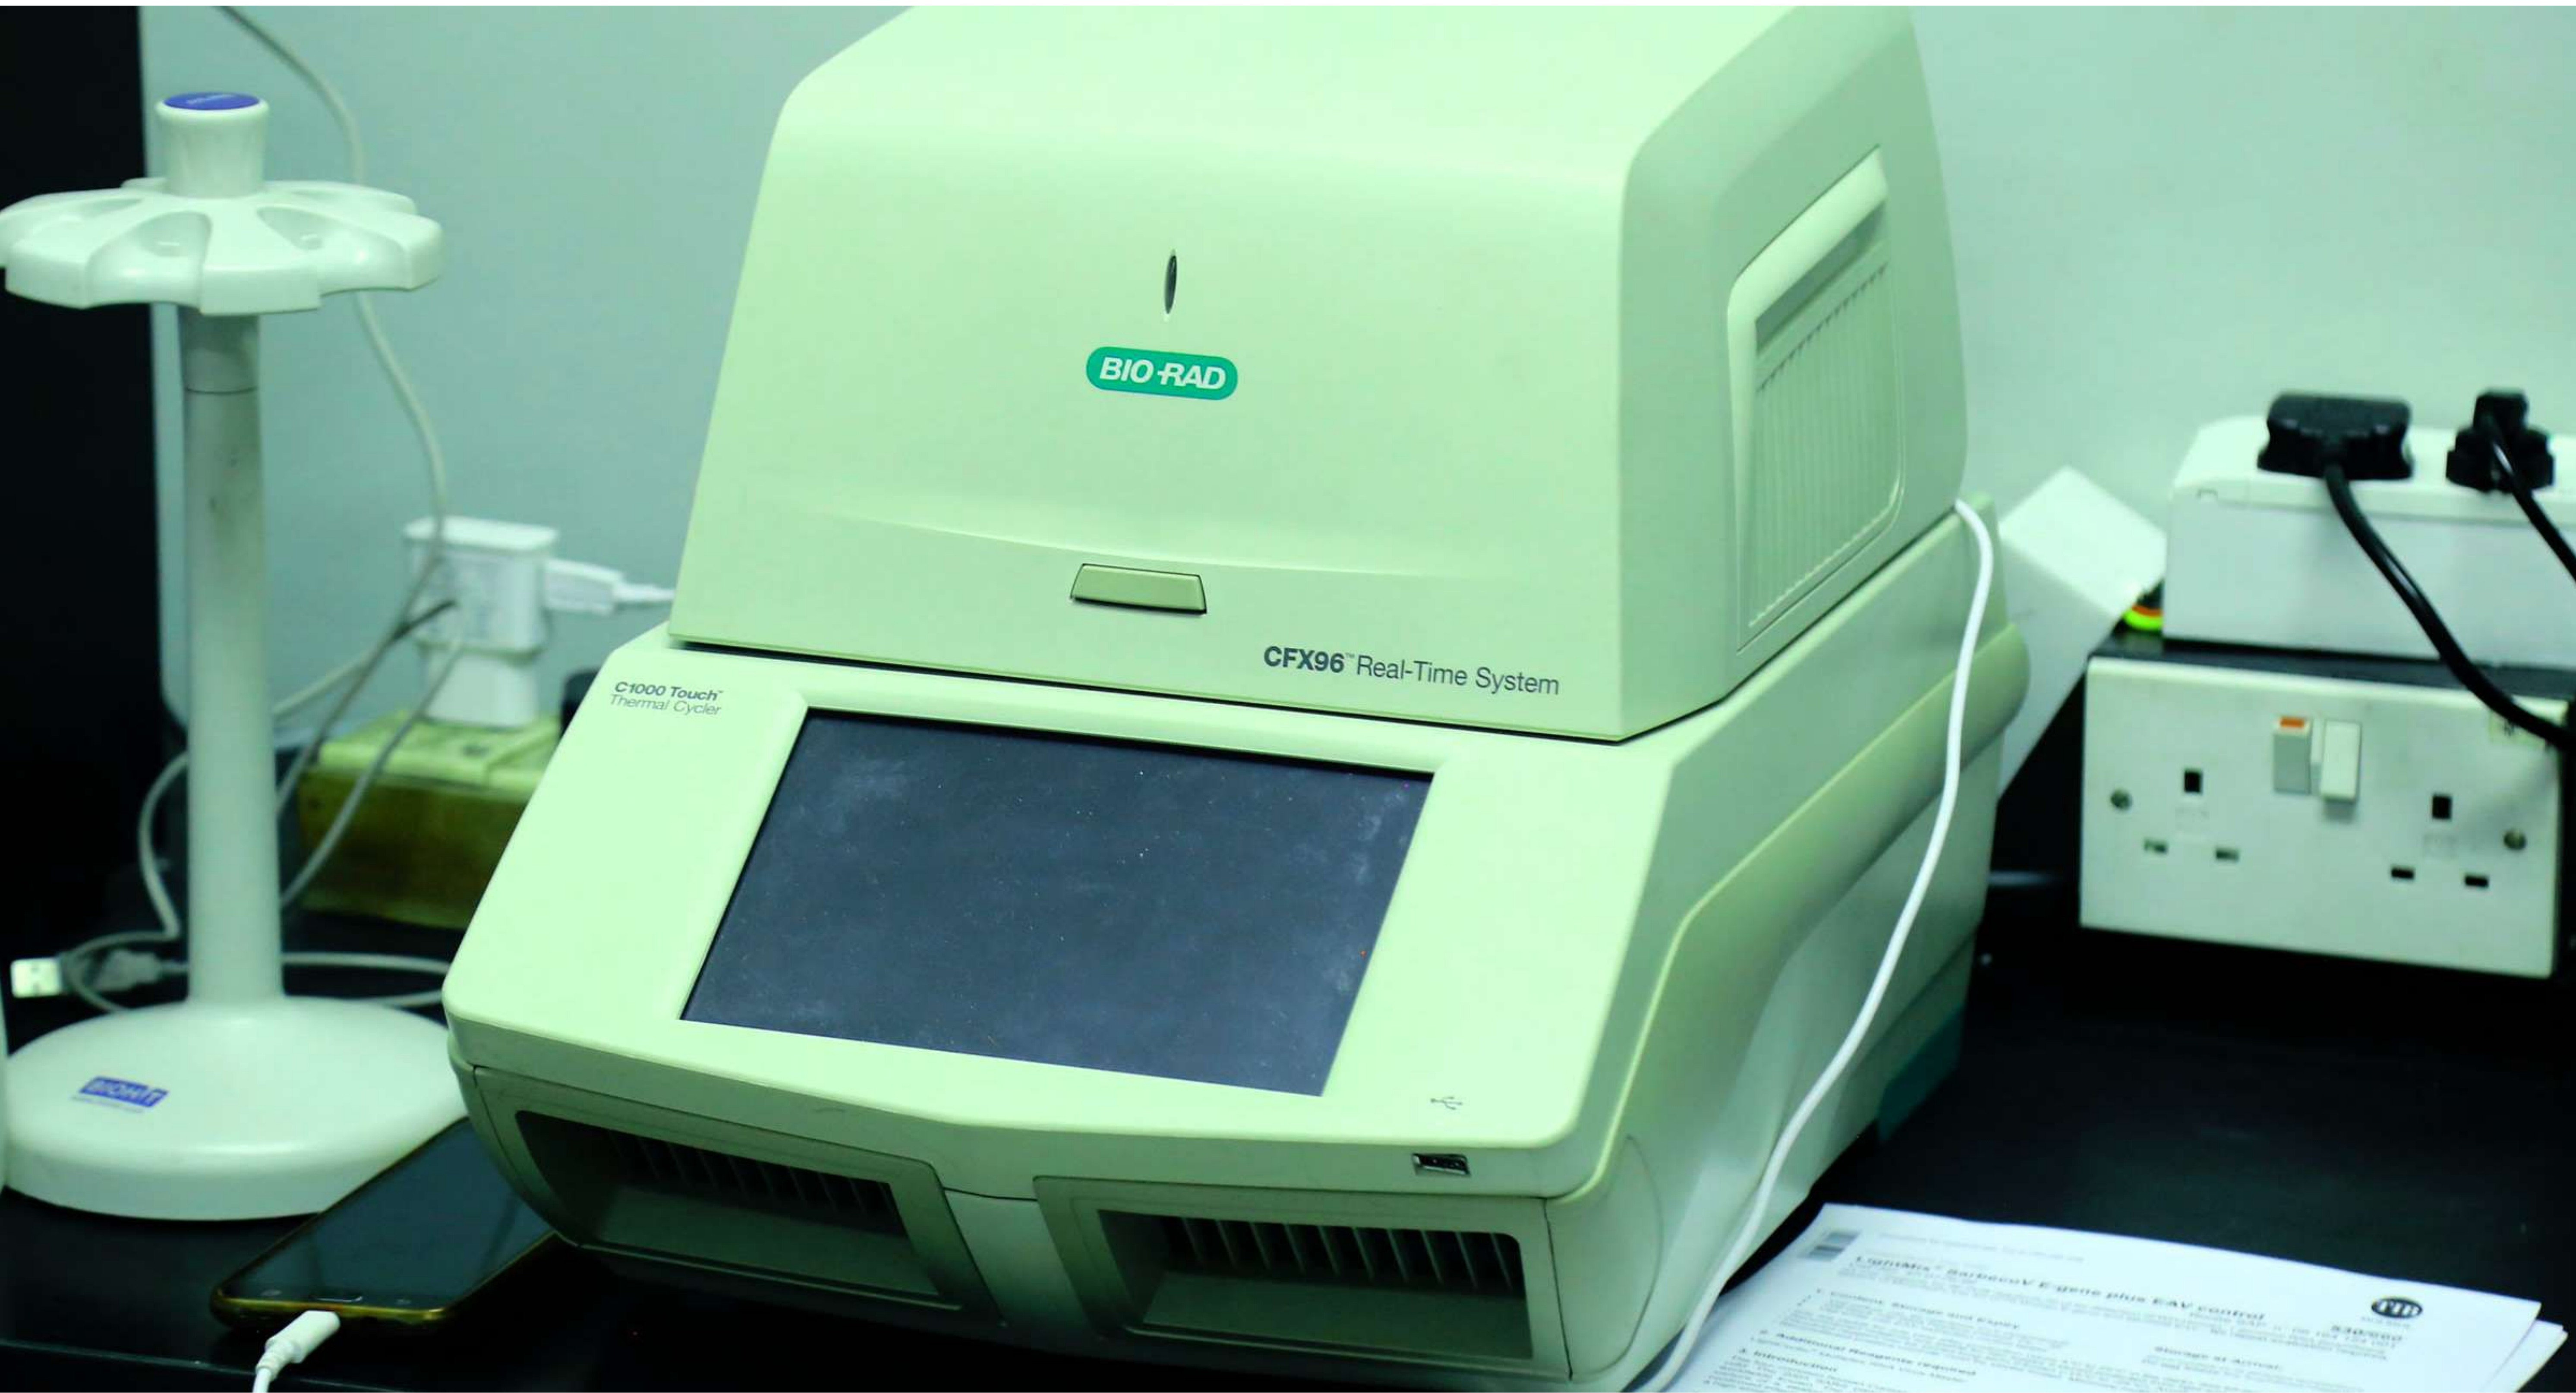

DIAGNOVITAL® SARS-CoV-2 Real-Time PCR Kit is a qualitative test for the detection of the 2019 novel coronavirus (SARS-CoV-2) in nasopharyngeal and oropharyngeal swab samples and is run on the BIO-RAD CFX96-IVD and QuantStudio™ 5 Dx.

The RNA Internal Control, used to monitor the entire sample preparation and PCR amplification process, is introduced into each specimen during sample processing. In addition, the test utilizes external controls (low titer positive control and a negative control).

Performance Characteristics of the DIAGNOVITAL SARS CoV-2 Real-Time PCR Kit

	Performance (%)
Sensitivity	100
Specificity	100
Positive Predictive Value	100
Negative Predictive Value	100

CFX96 Touch Real-Time PCR Detection System

The CFX96 Touch Real-Time PCR Detection System is a flexible and precise real time PCR instrument. It's unsurpassed thermal cycler performance and innovative optical design produce accurate, reliable data.

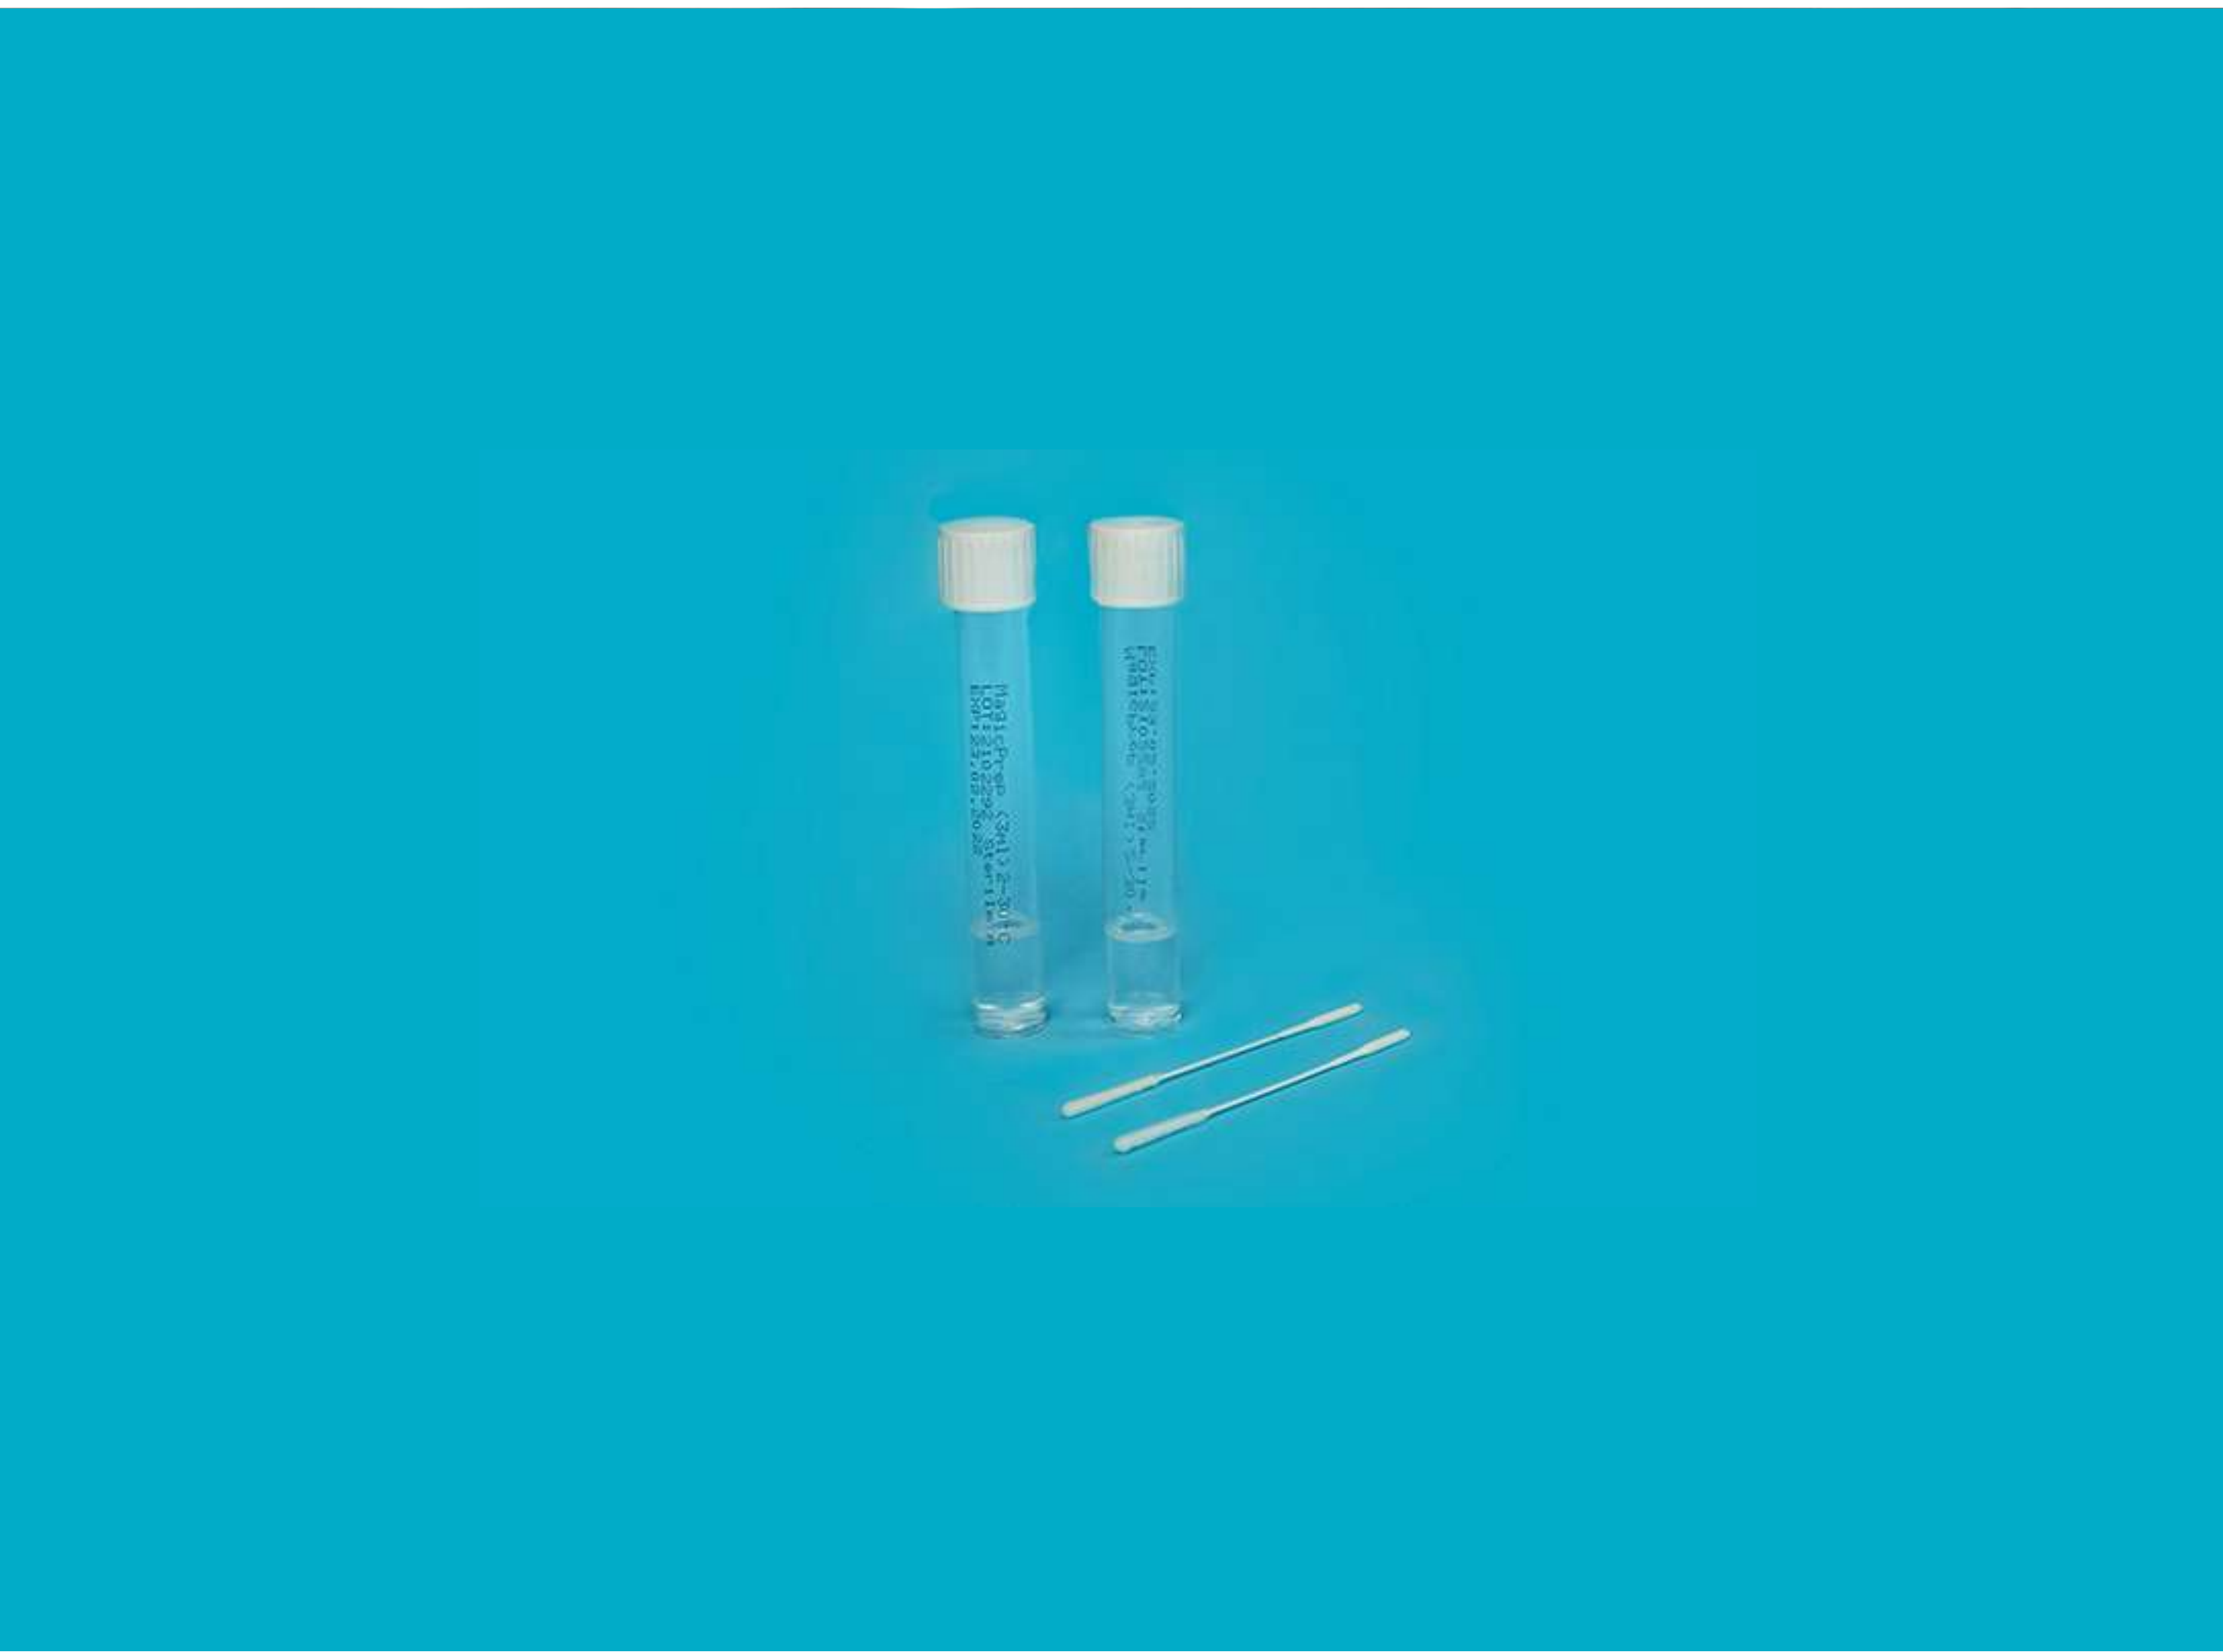

- Uniform Thermal Cycling
- Innovative Optical Design
- Effective Optimization

DIAGNOVITAL HS V2 SARS-CoV-2 RT-PCR kit

- Compatible on any device with FAM, HEX Channels
- Covers N1 and N2 regions of the nucleocapsid gene
- PCR reaction time - 50 minutes
- Specificity - 100%

DIAGNOVITAL Magic Prep Fast Extraction Kit

- High yield of RNA in 10 minutes only
- CE-IVD labelled
- No need for additional VTM or swab for sample collection
- Room temperature storage

MOUTH SWAB TEST

The mouth swab drug test is the least invasive method of drug testing. No needle pokes or peeing in a cup required.

During a mouth swab test, the patient starts by tilting their head back, then we:

Take the tube out of the packet, unscrew the lid and stand the tube on a stable surface.

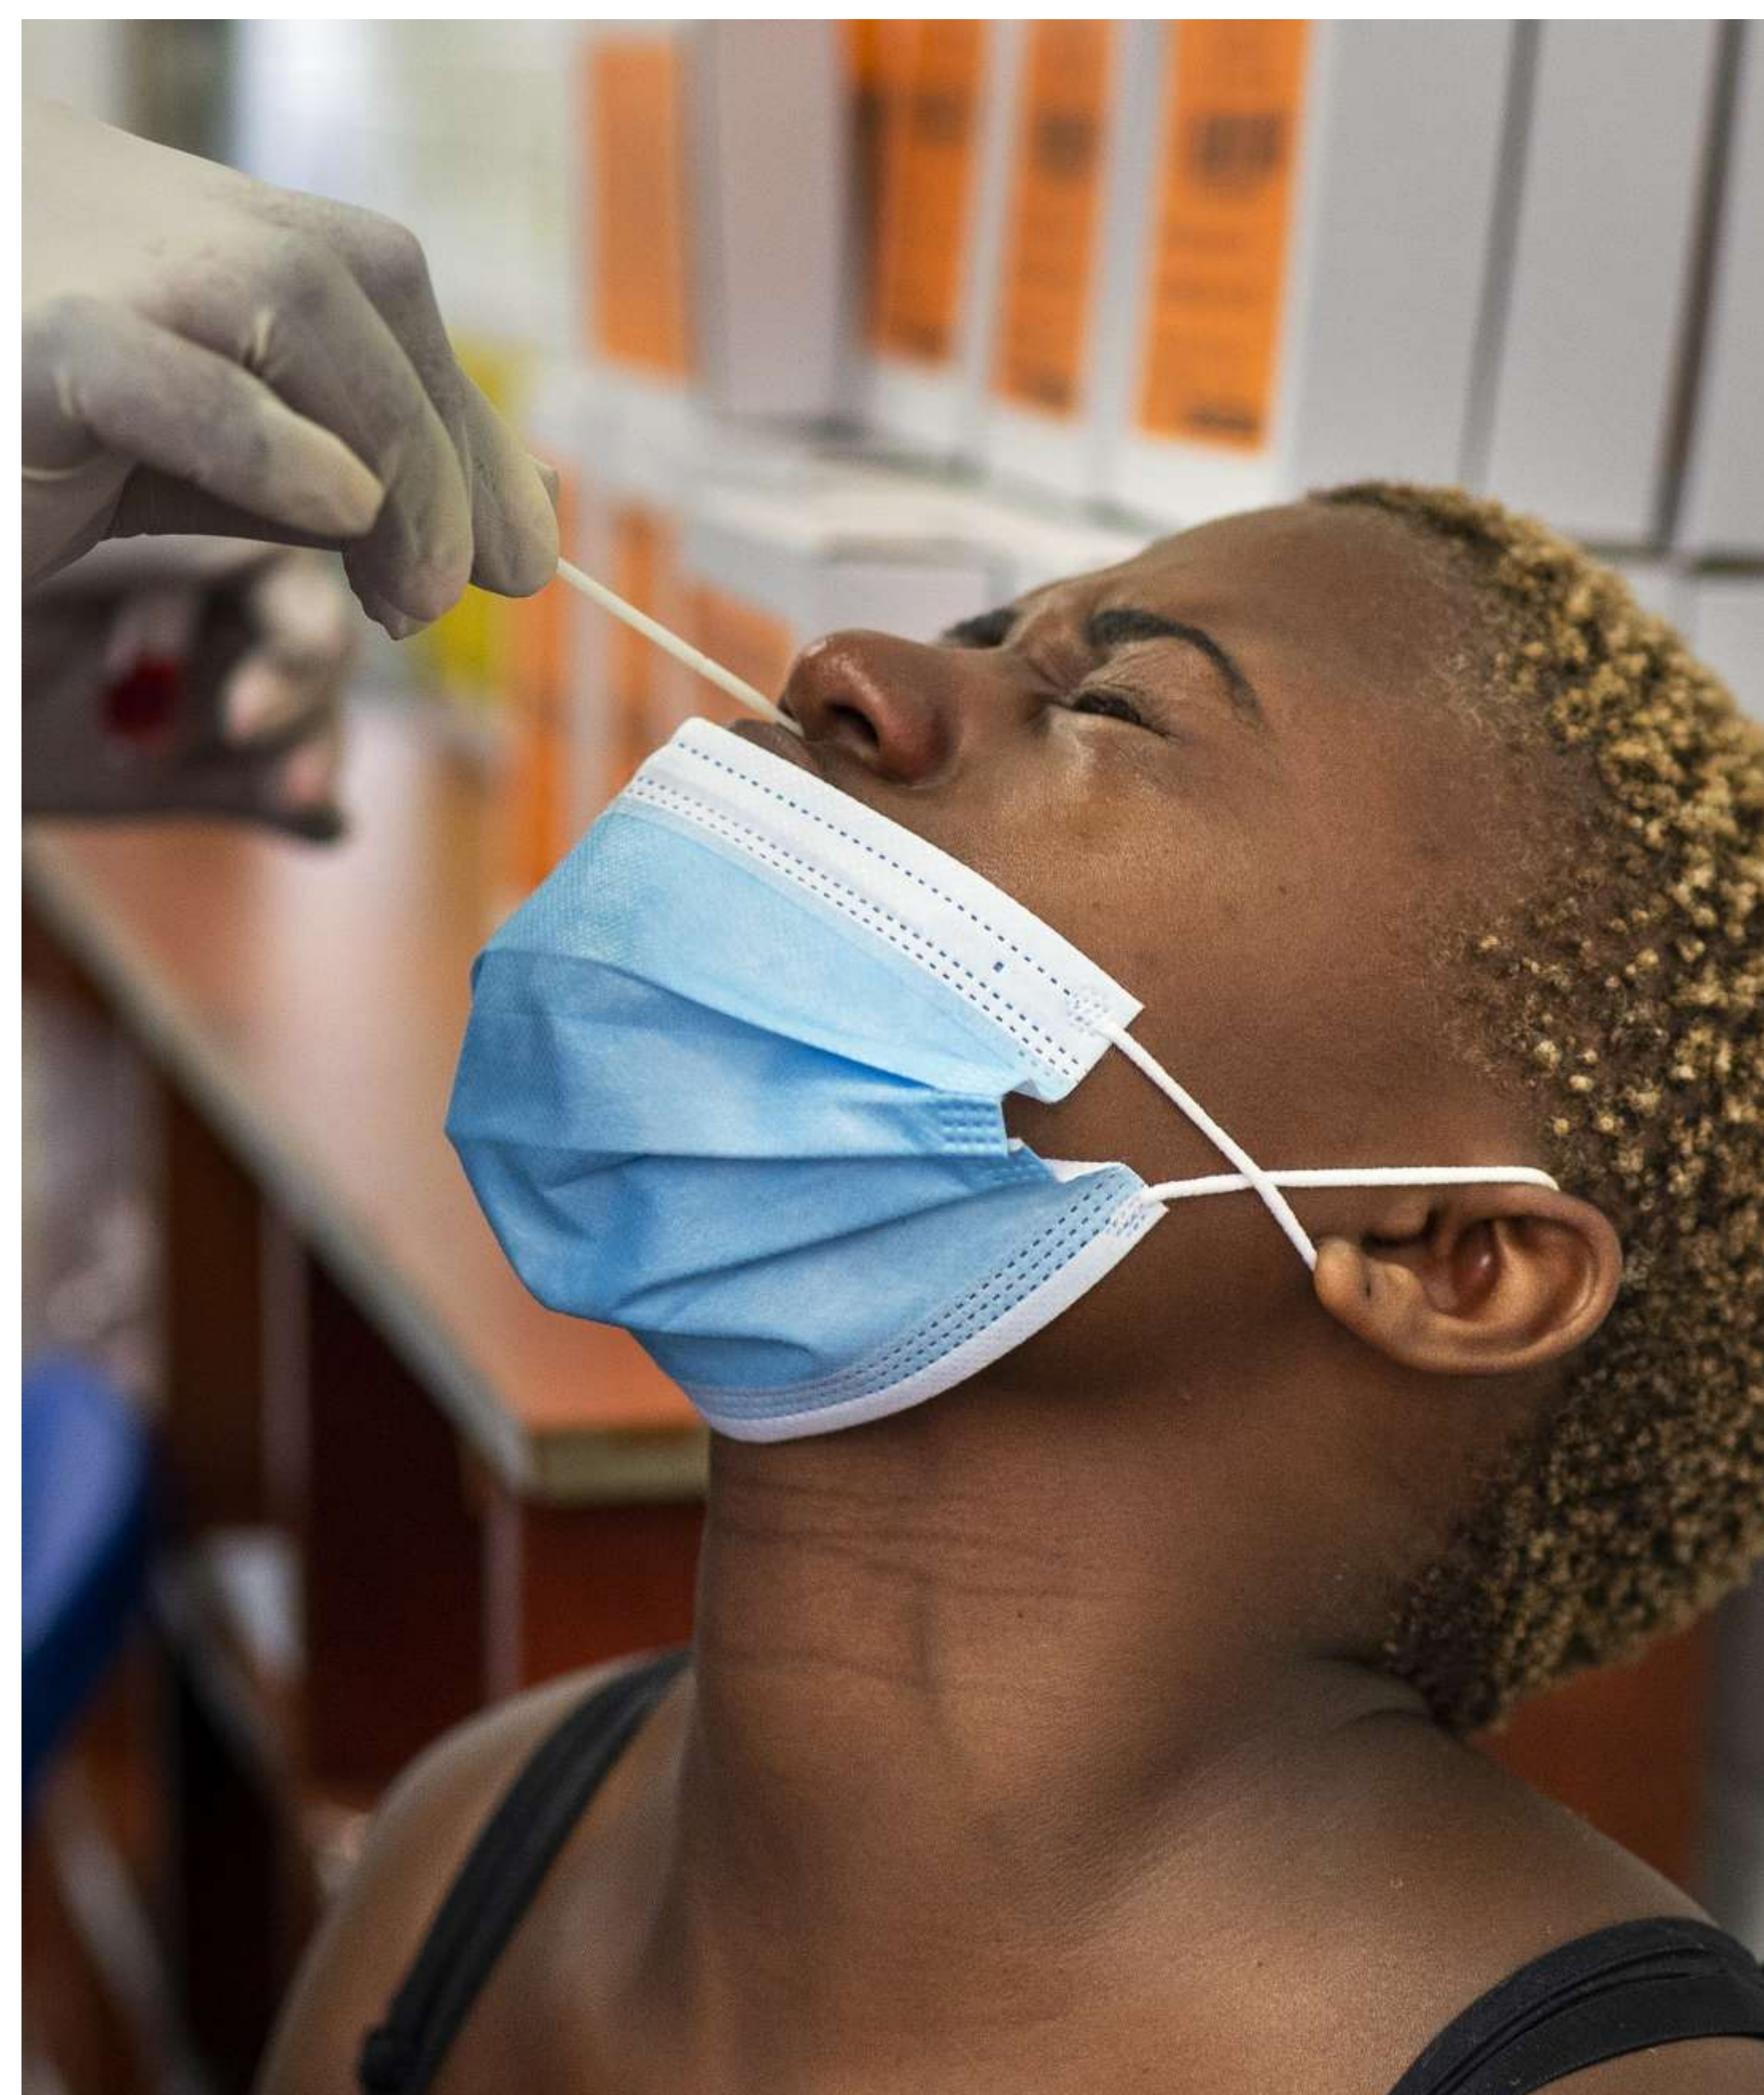

- Take the swab out of the packet without touching the padded tip.
- Ask the patient to stick out their tongue.
- Use the tongue depressor to hold down the back of their tongue.
- Without touching the sides of their mouth or tongue, gently scrape the back of their throat and tonsil area.
- Take the swab out without touching any other parts of their mouth.

NASAL SWAB TEST

During a nasal mid-turbinate (NMT) swab, you will start by tilting your head back. Then we:

- Gently insert a swab onto the bottom of the nostril, pushing it until you feel it stopping.
- Rotate the swab for 15 seconds.
- Remove the swab and insert into your second nostril.
- Swab the second nostril using the same technique.
- Remove the swab.

PCR test (rapid)
Result in 2 hours

PCR test (regular)
Result in 6 hours

Rapid antigen test
Result in 15 minutes

Due to the ongoing pandemic, airlines still require that passengers have a negative PCR Certificate before being allowed to board an aircraft. It turns out tourists or international travelers would absolutely require this certificate in order to fly, thus, giving them an additional task before departure.

The seamless and exclusive collaboration between **Sameday Laboratories** and **Uganda Airlines** would offer fast, safe, competitive and efficient Covid-19 testing for its staff and passengers at their convenience as part of the airline services already being offered. This serves as a value added service offering from Uganda Airlines to provide further convenience for its passengers.

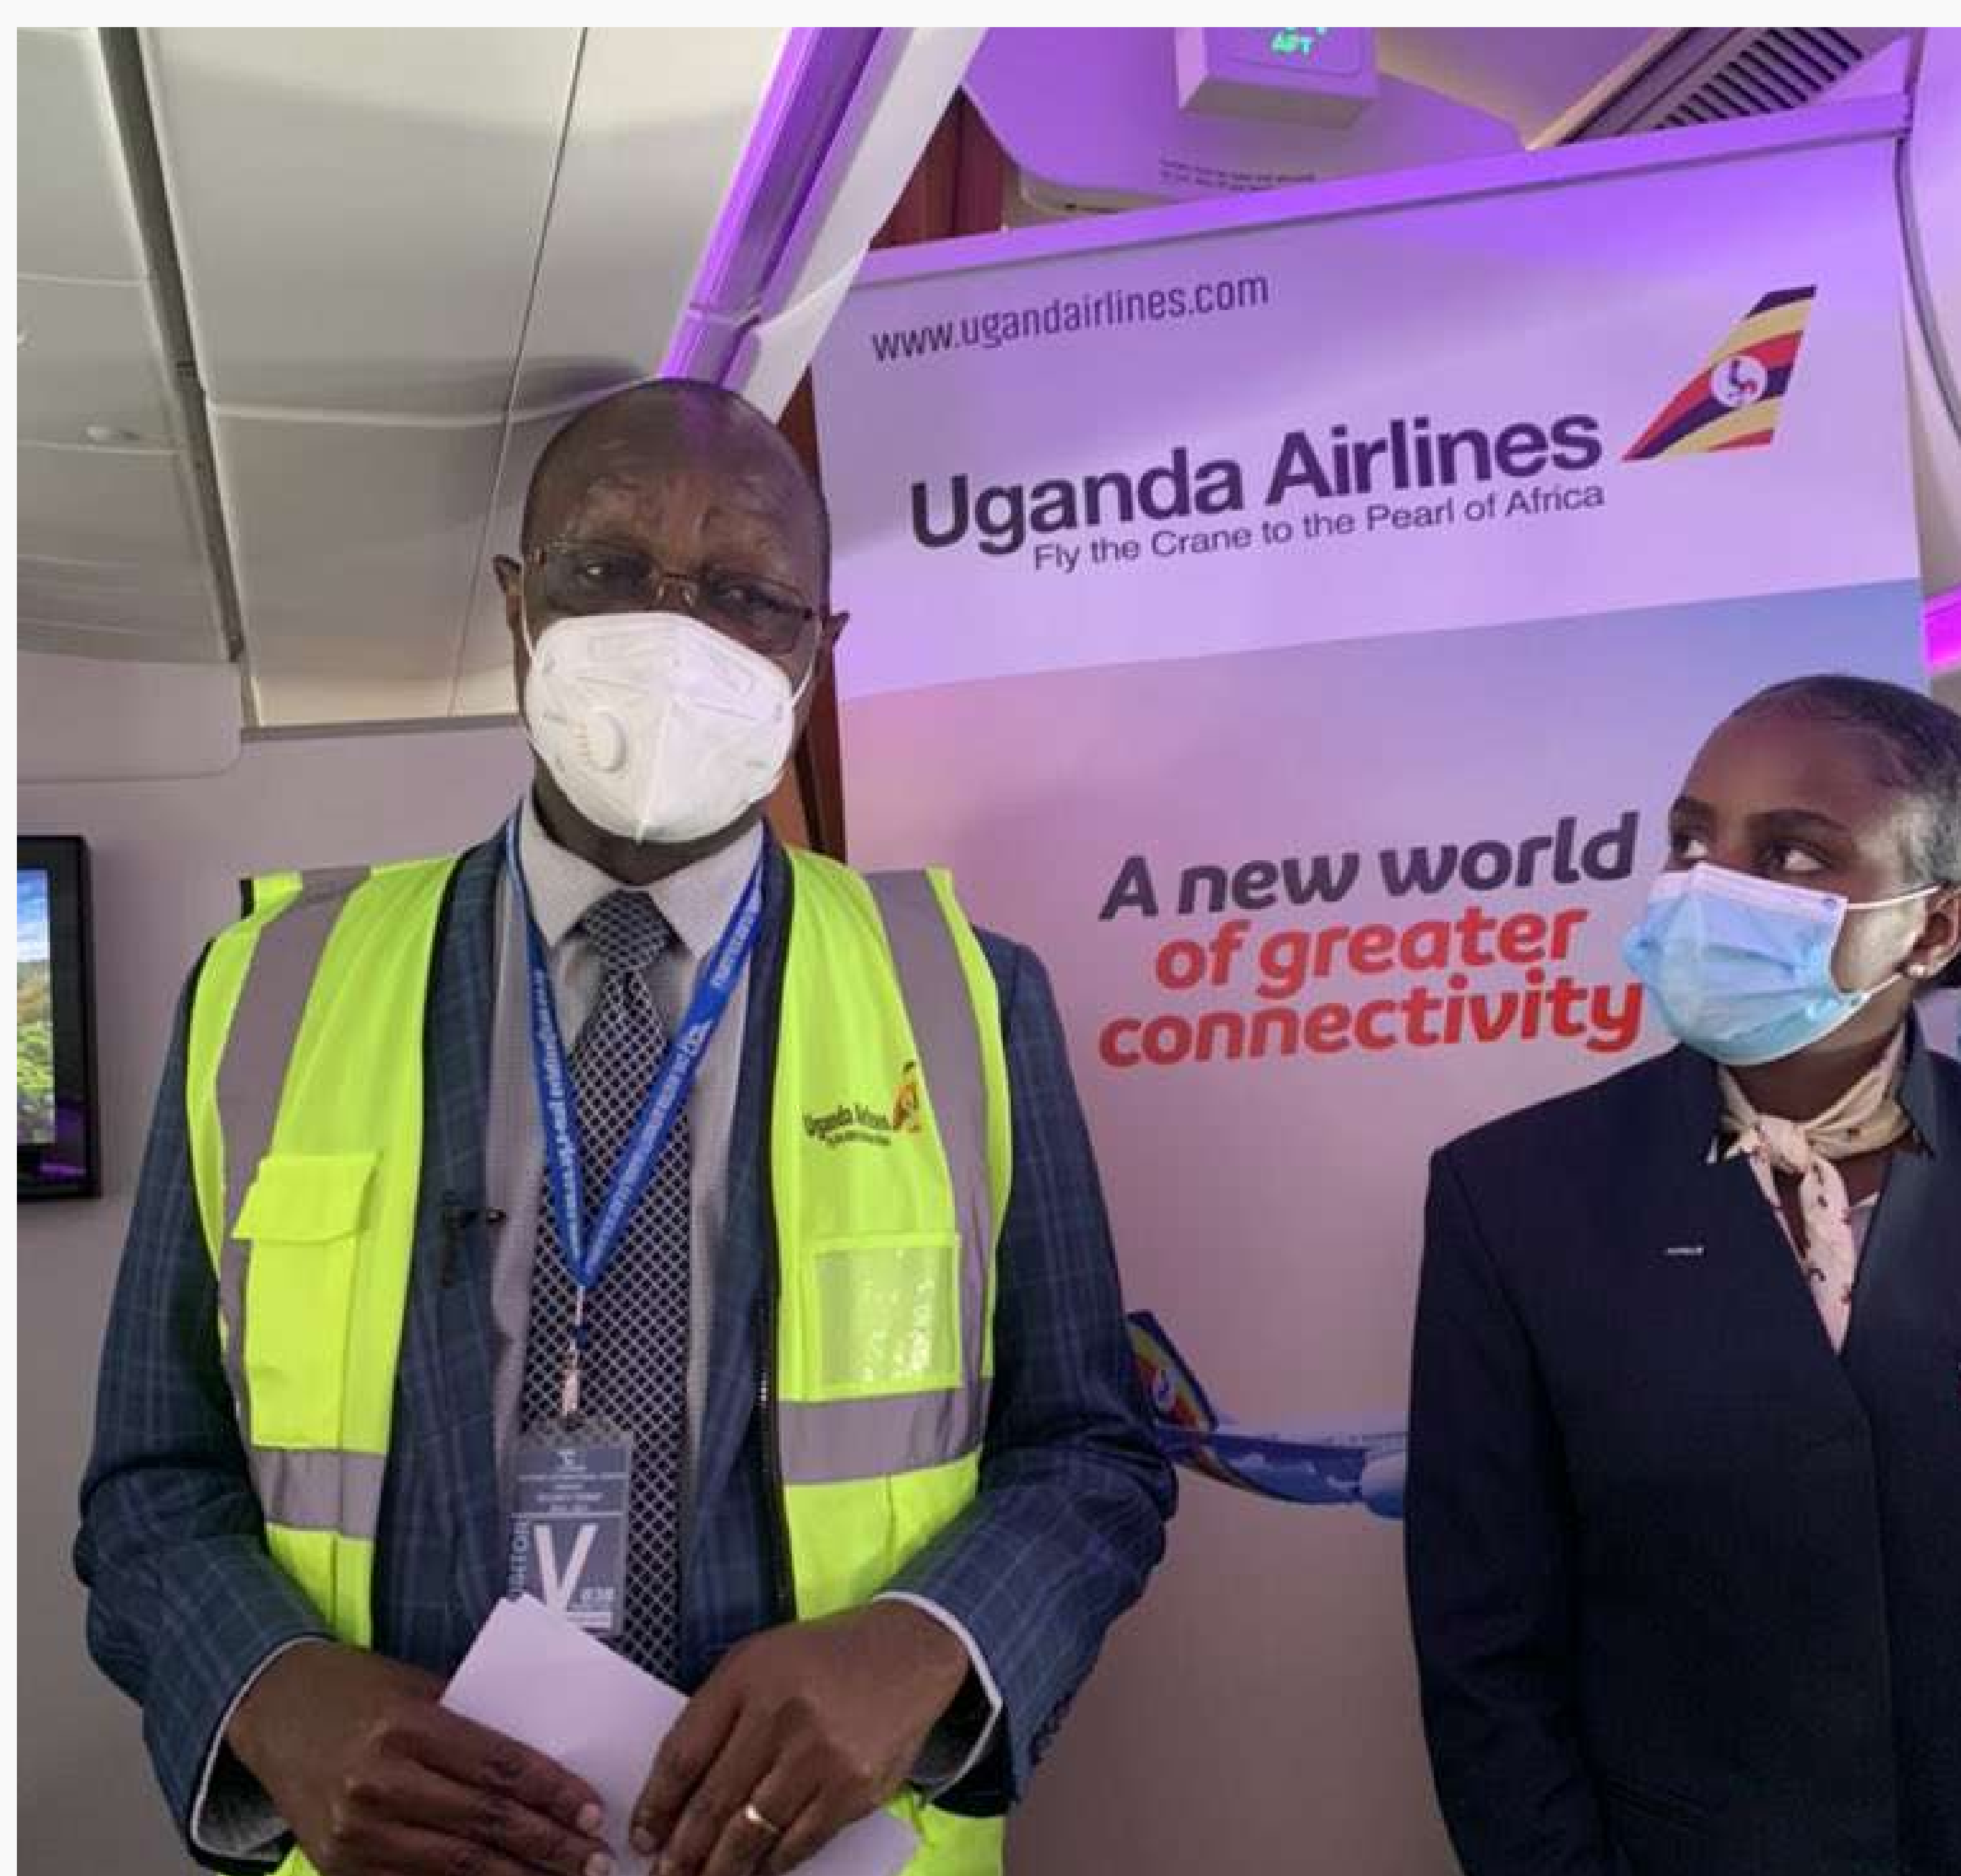

WHY TEST PASSENGERS, STAFF, AND CREW

- Airline staff are directly exposed multiple times while conducting flights and attending to passengers.
- Since some infected people have no COVID-19 symptoms, and people who do develop symptoms can already transmit the disease a day or two before they appear, testing passengers at regular intervals is important.
- Screening staff and crew weekly might reduce their contribution to transmission significantly.
- In compliance with government directives regarding corporate bodies, airlines must test staff before entering a workplace and periodically.
- It also helps in quickly identifying and separating infected employees to avoid widespread infection and halting of work completely.

KEY ADDITIONAL BENEFITS FOR UGANDA AIRLINES

A SPECIAL DISCOUNT ON PCR TESTS FOR UGANDA AIRLINES PASSENGERS WILL BE NEGOTIATED.

TWO SEPARATE PCR TESTS ARE REQUIRED FOR ALL TRAVELERS

The first is to be taken 48 hours before traveling

**PASSENGERS CAN TEST AT OUR
KAMPALA OR ENTEBBE LOCATION**

The second is to be taken 4 hours before traveling

**PASSENGERS CAN TEST AT OUR
AIRPORT LOCATION**

**SAMEDAY LABORATORIES IS OFFERING
BOTH PCR TESTS AT A SPECIAL
DISCOUNTED RATE**
